

REXJAMES Beef Finisher

Rex James Beef Finisher is a nutritious grain supplement specifically designed to finish cattle in a feedlot or pasture supplement situation. Rex James Beef Finisher contains a balanced blend of a cereal grain and natural protein sources and is enriched with vitamins and minerals to give your stock the best chance to reach their genetic potential and achieve desired production targets.

Crude Protein	Min 16.0 %
MJ ME/ kg DM	Min 11.5 MJ
Crude Fibre	18%
Crude Fat	Max 5%
Salt	Max 1.1%
Urea	Nil

*Typical analysis at 89% dry matter

Benefits:

- Rumensin® (Monensin sodium) has been included to improve growth rates and feed conversion efficiency.
- High quality vitamin, mineral and trace mineral premix included to support rapid growth and to boost the immune system.
- A rumen buffer has been included to reduce the risk of digestive upset.
- High quality natural protein sources, balanced with proven starch

REXJAMES Beef Finisher

Directions of use:

Rex James Beef Finisher has been specifically designed to finish cattle over 6 months of age and weight more than 250kg. To ensure digestive function is not impaired Rex James Beef Finisher should be fed with at least 25% roughage (i.e. Cereal hay or straw).

All new feedstuffs should be introduced into the diet over a period of 14-21 days, as this gives the rumen microbes time to adapt to the new feed and will reduce the risk of acidosis. During this time introduce Rex James Beef Finisher at 0.5kg/head/day and increase this over the introduction period. A Maximum of 2kg of Rex James Beef Finisher to 100kg of live weight can be fed.

To achieve maximum daily gains and minimum digestive upsets ensure cattle have adequate access to a continuous supply of feed (both Rex James Beef Finisher and roughage), it is also imperative that they have access to clean water at all times as this will maximise intakes.

Sizes

25kg bags, Bulka Bags and Bulk

Withholding periods:

Meat: Cattle - Nil

Contraindications:

This Product Contains Rumensin® (Monesin Sodium). **DO NOT** allow dogs, horses or other equine access to this feed, as it may be fatal.
